XIANGZHOU (JONAS) SUN

School: jonassun@mit.edu | **Personal:** jonassunhk@gmail.com | **LinkedIn:** www.linkedin.com/in/jonassun2006
Current Address: 229 Vassar St, Cambridge, MA 02139, USA | **Cell:** (909) 480 9596

EDUCATION

Massachusetts Institute of Technology Cambridge, MA
Time: 2025-2029 GPA: 5.0/5.0
Bachelor of Science in EECS (6-5) + Mathematics (18)
Selected Courseload: Linear Algebra and Optimization, Design and Analysis of Algorithms, Advances in Computer Vision (Grad), Probability and Random Variables, Introduction to Autonomy

RESEARCH

Benchmarking LLM Intelligence via Embodied Agents, Winter 2025 - Summer 2026
- Submitted to NeurIPS 2026
- Collaborated with Google DeepMind and MIT's Info Lab on developing an open robotics simulation platform for measuring the physical intelligence of LLMs

Improving World Models for Physical Reasoning, Fall 2025 -
- Contributed Talk + Spotlight (Top 10%) at Cognitive Computational Neuroscience 2026
- Kanwisher Lab, MIT McGovern Institute
- Using saccade and foveation mechanisms to improve JEPA architecture for object collision tasks

Vision-Language-Action Models and Augmented Reality for Robotics Data Collection, Summer 2026 -
- Collaborative Learning and Autonomy Research Lab (CLEAR Lab), MIT
- Tackling robot-human alignment through foundational models and system design

PROJECTS

GazeLink: AI-driven Eye-Controlled Mobile System, Summer 2023 - Spring 2025
- Won "Best Android App" and 50k reward at Gemini API Developer Competition, Google
- Tested on 100+ participants with 7x improvement compared to low-tech solutions
- Published work and implemented computer vision and generative AI algorithms

WORK EXPERIENCE

AI Student Researcher @ MIT
- Mcgovern Institute and Computer Science Artificial Intelligence Lab (CSAIL)

Part-time Software Engineer at NeuMatic Fall 2024 - present
- Developing new Spiking Neural Network (SNN) architecture for bio-inspired AI

LEADERSHIP

Human Technology Integration Club (HTIC) @ MIT Team Lead**,** Fall 2025 - present
Head of Product Development in AI-Driven Accessibility Association (AIDA), Winter 2023 - present
- Co-founded the AIDA to support the disabled population with assistive technology

SKILLS

Software: PyTorch, TensorFlow, MATLAB, Android Studio, Flask, Linux
AI: Computer Vision, Machine Learning, Large Language Models, Natural Language Processing
Programming Languages: Python, Java, C++, C, Lua, C#

ACTIVITIES

IEEE/ACM Club @ MIT Faculty-Student Relations Chair, Fall 2025 - present
Assistive Technology Club @ MIT Software Engineer, Fall 2025 - present

HONORS

Google Gemini API Developer Competition "Best Android App", $50k award, Winter 2024
Brain Storm BCI Hackathon, Precision Neuroscience, 2nd place winner, Winter 2025
International Science and Engineering Fair Grand Award (2nd place) in Systems Software + 2 Special Awards (2nd place in AAAI and 3rd place in IEEE), Spring 2024
USA Computing Olympiad Platinum Division (highest), March 2023
